

JIVE ARCHIVING

Easily capture Jive communications for compliance and eDiscovery.

ARCHIVE ALL COMMUNICATIONS USING YOUR EXISTING INFRASTRUCTURE

Jive is a collaboration and knowledge management tool. It's Chime mobile app powers real-time messaging for teams. It describes itself as "Social intranet software that drives employee engagement and productivity" and it connects "all your people, information and systems in a single collaboration hub and digital workplace." Jive was acquired by Aurea software in June 2017.

Communications taking place over Jive can easily be archived when adding Merge1 to your existing infrastructure. As opposed other solutions, which require sending your workforce's critical, sensitive communications to a third party data store, Merge1 captures Jive communications and stores them in your existing email archive, whether on-prem (e.g. Veritas Enterprise Vault) or in the Cloud (e.g. Microsoft Office 365).

Once archived, Jive communications can be retained, supervised for compliance and searched for eDiscovery and internal Information Governance.

Merge1 for Jive features:

- Captures emails and chats
- Supports persistence chats
- Archives attachments
- Preserves headers, original message time and other data for accurate search and retrieval during eDiscovery
- Archives custom headers (where applicable) to allow for easy search
- Produces a similar look and feel as the native message

- Combines chats into easy to read threads

Benefits of Merge1:

- Avoid fines, penalties and other enforcement actions by regulatory bodies such as the SEC and FINRA
- Reduce compliance related costs and recurring fees
- Mitigate risk involving internal investigations, external audits and lawsuits
- Maintain control over your data
- Capture all communications.

Archive popular message content types including social media, IM, financial platforms, and Cloud-based content.

Merge1 archives dozens of content types and can be customized to archive any content.

Archiving all your content with Merge1 helps you comply with industry regulations and enhances your eDiscovery results.

The ideal combination of power and simplicity:

- Archive agnostic
- Fully customizable
- On-prem or Cloud
- Easy to set up and deploy

“Merge1 is an integral and invaluable tool. My team uses Merge1 to meet company needs for capturing EML/Reuters, Blackberry, Symphony and Bloomberg data. The product is intuitive, easy to set up, and I appreciate the personalized sale and support attention we receive. I would recommend Merge1 to anyone.”

– VP of Compliance at a Large International Bank
