THE FEDERAL BUREAU OF INVESTIGATION (FBI)

Globanet Helps the FBI Migrate over 100TB of Data

COMPANY OVERVIEW

The **Federal Bureau of Investigation (FBI)** is the domestic intelligence and security service of the United States and its principal federal law enforcement agency. A leading U.S. counterterrorism, counterintelligence, and criminal investigative organization, the FBI has jurisdiction over violations of more than 200 categories of federal crimes.

THE OBJECTIVE

The FBI needed an update to their archive per their internal next-level-best-practices. The organization required a solution that could address its data management concerns and meet their strict deadline. This required a migration of over 100TB of data, all of it confidential.

Issues included:

- Strict deadline to migrate data to a target
- Highly classified and confidential data

THE CHALLENGE

The FBI Tech Team we worked with has an environment that requires security, sensitivity and exclusivity. They had an internally set deadline to migrate the data to a new target. The process required speed and precision to ensure that their deadline was met, and that their data was migrated properly. Remote troubleshooting created an additional challenge due to the sensitive nature of the migrated material.

THE SOLUTION

They contacted us for our tools, archive health check and migration service. We assisted their in-house engineering team with the migration and reclassification from their legacy system to their new standards of excellence.

THE RESULTS

The migration was successfully completed in 8 months. This was a task that required precision due to the size, complexity, and sensitivity of the data. The FBI successfully migrated and classified over 99.999998% of their original data during the migration. The ease and success of this migration can be directly attributed to the open lines of communication and dedication on both teams. The FBI team of engineers was very knowledgeable and was able to effectively identify and communicate obstacles that came up with the migration. Their infrastructure and staff provided an optimum platform for handling such a large migration project. The FBI team was happy they were able to accomplish their upgrade and their data remained secured and confidential.

ABOUT GLOBANET

Globanet™ is a leader in Capture, Archive and eDiscovery solutions for the modern workplace, in addition to services for Data Migration, Compliance, Third Party Designation Services (D3P) and Third Party Archive Platforms. Founded in 1996, Globanet is a pioneer in data governance solutions. Globanet's portfolio of proprietary enterprise software include Globanet Merge1™, Globanet Migrate™, Globanet Classify™ and Globanet Balance™.
